

115TH CONGRESS
2D SESSION

H. R. 6006

To direct the Commissioner of Social Security to implement certain record keeping recommendations, and for other purposes.

IN THE HOUSE OF REPRESENTATIVES

JUNE 5, 2018

Mr. KING of Iowa introduced the following bill; which was referred to the Committee on Ways and Means

A BILL

To direct the Commissioner of Social Security to implement certain record keeping recommendations, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Social Security Integ-
5 rity Act of 2018”.

6 **SEC. 2. FINDINGS.**

7 Congress finds the following:

8 (1) Individuals can commit various types of
9 fraud against the Government by reporting earnings

1 under deceased individuals' Social Security Numbers
2 (SSNs).

3 (2) Various Federal entities rely on the Social
4 Security Administration's (SSA) death information
5 to detect unreported deaths and verify the accuracy
6 of reported deaths.

7 (3) The Numident is the SSA's computer data-
8 base file on all who have applied for a Social Secu-
9 rity number. The Office of the Inspector General
10 (OIG) of the SSA conducted an audit and deter-
11 mined that the SSA did not have controls in place
12 to annotate death information on the Numident
13 records of numberholders who exceeded maximum
14 reasonable life expectancies and were likely deceased.

15 (4) The OIG identified 34 cases in which it ap-
16 peared that the deceased numberholder's name and
17 Social Security Number (SSN) had been misused. In
18 one instance an employer reported paying wages to
19 someone from 2008 through 2012 using a
20 numberholder's name and SSN that had been born
21 in 1886. SSA payment records indicated that the
22 numberholder died in January 1965, but the SSA
23 did not record the numberholder's death on the
24 Numident. SSA continued paying benefits to the
25 numberholder's widow until her death in February

1 1973. SSA's Master Earning File (MEF) contained
2 no reported earnings information for this
3 numberholder from 1956 through 2007.

4 (5) The OIG determined that thousands of the
5 SSNs could have been used to commit identity
6 fraud. For tax years 2006 through 2011, SSA re-
7 ceived reports that individuals using 66,920 SSNs
8 had approximately \$3.1 billion in wages, tips, and
9 self-employment income. SSA transferred the earn-
10 ings to the Earnings Suspense File because the em-
11 ployees' or self-employed individuals' names on the
12 earnings reports did not match the numberholders'
13 names.

14 (6) During calendar years 2008 through 2011,
15 employers made 4,024 E-Verify inquiries using
16 3,873 SSNs belonging to numberholders born before
17 June 16, 1901. According to the OIG, these inquir-
18 ies indicate individuals' attempts to use the SSNs to
19 apply for work.

20 (7) The OIG determined that resolving these
21 discrepancies will improve the accuracy and com-
22 pleteness of the Death Master File and help prevent
23 future misuse of these SSNs.

24 (8) The American taxpayer deserves to have the
25 surety of knowing that every agency and department

1 within the Federal Government takes the prudent
2 actions necessary to prevent future fraud and waste
3 of hard-earned dollars.

4 (9) In 2015, the OIG identified approximately
5 6.5 million numberholders age 112 or older who did
6 not have death information on the Numident.

7 (10) The Social Security Administration has re-
8 ported success in updating the Numident. In 2016,
9 the Social Security Administration listed 5 million
10 Americans as 112 years old or older who did not
11 have death information on the Numident, which is
12 1.5 million fewer than the OIG reported in 2015.

13 (11) In line with the OIG's recommendations,
14 the SSA should take proactive action to fully protect
15 the American taxpayer by ensuring that there are
16 comprehensive controls in place to annotate death
17 information on the Numident records of
18 numberholders who exceeded maximum reasonable
19 life expectancies.

20 **SEC. 3. IMPLEMENTATION OF OIG RECOMMENDATIONS.**

21 (a) IN GENERAL.—Not later than 3 years after the
22 date of the enactment of this Act, the Commissioner of
23 Social Security shall implement all of the recommenda-
24 tions described in the memorandum from the Office of the
25 Inspector General of the Social Security Administration

1 entitled “Numberholders Age 112 or Older Who Did Not
2 Have a Death Entry on the Numident (A-06-14-34030)”
3 and dated March 4, 2015.

4 (b) REPORT.—Not later than December 31 of each
5 calendar year that begins after the date of the enactment
6 of this Act and ends before the date that is 3 years after
7 such date of enactment, the Commissioner shall submit
8 to the Congress a report on the progress made toward im-
9 plementation of each of the recommendations described in
10 the memorandum specified in subsection (a), the methods
11 used to implement such recommendations, the amount of
12 funds expended and any other resources utilized to imple-
13 ment such recommendations, and the projected date of full
14 implementation.
